DETAILED ACTION

Claim Objections

1. Claims 1, 29, 30, and 34 are objected to because of the following informalities: The recitation that R^{40} and R^{41} “can be” different introduces uncertainty to the claim since it is not certain whether these are the actual embodiments. Use of “are” in lieu of “can be” is suggested. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-72 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1, 29, 30, and 34 recite a compound in which R^{40} and R^{41} are identical or different and are each an alkyl group having from 2 to about 30 carbon atoms. The claim further states that where R^{40} and R^{41} are different and R^{40} is a hydrocarbon group of from about 4-40 carbon atoms, R^{41} is a hydrocarbon group of about 1-40 carbon atoms. The metes and bounds of the claim are rendered indefinite because: (i) the presence of a hydrocarbon group of about 1-40 carbon atoms (the specification and examples indicate clearly that this represents a methyl group) does not satisfy the initial requirement that alkyl groups must have from about 2 to about 30 carbon atoms, and (ii) the initial portion of the claim states that R^{40} and R^{41} when different may be a variety of substituents, however, the claim later specifies that R^{40} and R^{41} when different are hydrocarbon groups.

In both instances, the claims contain a broad range or limitation together with a narrow range or limitation that falls within the broad range or limitation (in the same claim). This is considered indefinite, since the resulting claim does not clearly set forth the metes and bounds of the patent protection desired. See MPEP § 2173.05(c). Note the explanation given by the Board of Patent Appeals and Interferences in *Ex parte Wu*, 10 USPQ2d 2031, 2033 (Bd. Pat. App. & Inter. 1989), as to where broad language is followed by "such as" and then narrow language. The Board stated that this can render a claim indefinite by raising a question or doubt as to whether the feature introduced by such language is (a) merely exemplary of the remainder of the claim, and therefore not required, or (b) a required feature of the claims. Note also, for example, the decisions of *Ex parte Steigewald*, 131 USPQ 74 (Bd. App. 1961); *Ex parte Hall*, 83 USPQ 38 (Bd. App. 1948); and *Ex parte Hasche*, 86 USPQ 481 (Bd. App. 1949).

Since dependent claims 2-28, 31-33, and 35-72 depend from the cited independent claims, they are subsumed under the rejection.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 29 is rejected under 35 U.S.C. 102(b) as being anticipated by Rohrmann *et al.* (U.S. 4,985,576).

Rohrmann *et al.* discloses the free ligand, 1,1'-(diethylsilanediyl)*bis*indenyl (1:1 ratio of diastereomers). In this case, R⁴⁰ and R⁴¹ are the same, and they are hydrocarbon/alkyl groups containing two carbon atoms.
